For release Thursday, June 27.

## ENOS ON DOCTORAL STUDY LEAVE

Ed Enos Loyola's Director of Physical Education and Athletics for the past three years will take his first extended break from his post to pursue doctoral level studies in the field of education with special emphasis on physical education.

Enos is returning for the summer to Boston University where he was awarded an M.A. with honors in 1965 for his Ph.D. His academic background also includes a B.Sc. from the Univ. of Connecticut. Ed hopes to complete his doctorate on a part time summer basis within a five year period.

Loyola's Director of Physical Education and Athletics who is a leading candidate for a post graduate scholarship has already completed preliminary work on a Boston University study concerned with the rehabilitation of children with Cerebral Palsy. His next endeavor before settling down to strictly classroom work will be engaging in a two week Physical Fitness Institute which will stress Cardio-Vascular and Cardio Respiratory Research. The eminent Cardiologist Dr. Paul Dudley White who cared for President Eisenhower heads the list of impressive Institute instructors.

Ed is to officially represent Quebec's Commissioner of Sport, Louis Chantigny during this period. Upon his return in late August Enos will be submitting a report dealing with a Physical Fitness Program and a suggested system of awards exclusively for the Province of Quebec.

One of Enos' fondest hopes is to establish a School of Physical Education upon completion of his studies On the Loyola University Campus.

Ed's work in the field of physical education has been overshadowed by his accomplishments in athletics as a player, coach and administrator. However, he has been equally active in physical education and is one of the founding members of the International Council on Health, Physical Education and Recreation, involved with the Canadian and American Associations of Health, Physical Education and Recreation and is also a member of the National Foundation for Health, Physical Education and Recreation.
